Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 – 6 and 12 – 14, drawn to a cylindrical article / method of insertion molding a cylindrical article.

Group II, claim(s) 7 – 11 and 15 – 20, drawn to an apparatus for molding a cylindrical article.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The apparatus of Group II may be used in a method which is materially different from the process of Group I, such as a molding method other than insertion molding. Furthermore, in the process of Group I the use of an insertion injection molding mold is claimed, whereas in Group II the use of an apparatus comprising a barrel portion – molding mold unit and an end portion – mold molding unit to be engaged with the barrel portion – molding mold unit at the other end of the outer mold unit is claimed.

3. A telephone call was made to Mr. Jams Oliff on September 25, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1772

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
